## DEFINITIONS

- [Scrum Master](#): The scrum master is a professional coach for a small team of professionals including software developers, quality assurance technicians, and business analysts. Their focus is on helping small teams perform at their highest level while providing valuable insight into team performance for executive leadership.
- [Agile Coach](#): A senior scrum master responsible for coaching other scrum masters and teams while providing a strategic application of agile methods within an organization.
- [Executive Coach](#): A consultant who provides confidential support and advice to business leadership around a variety of management skills including team building, employee accountability, communication, and strategic planning.
